

YES CAFÉ

THE SIMPLE & INEXPENSIVE COFFEE DISPENSER

Simplicity itself. Press a button to dispense a pre-measured amount of Coffee, Creamer or Sugar into your cup and then use the hot water from your Hot & Cold Water Cooler or Boiler and hey presto – there is your hot drink.

Yes Café is totally mechanical – and therefore very reliable. All you need is a screwdriver to fix it to the side of your Water Cooler or to a wall.

In order to refill the ingredients' bottle, simply slide the entire unit out of its holding bracket, turn it upside down to unscrew the bottle and refill. Why has nobody thought of such a simple system before?

Even better, the Yes Café Coffee Dispenser costs a mere £25.50. Little, if you consider the potential for additional ingredients sales and increased water consumption.

At AA First we love simple solutions and we hope you will too.
